

Exploded Isometric Assembly View

These details
show how the
TOP BEAM
should be
fabricated.

See NOTE 1

See NOTE 2

See
NOTE 3

Column Cutaway Detail

NOTES:

- 1 The TOP BEAM (page 4),
is fabricated from 6 pieces
as shown above.
See Instructions for more details.
- 2 This diagram shows how the COLUMNS
are folded to form a slot to receive the
tabs on the ends of the GIRDER.
- 3 Rather than cutting out and gluing
all the layers shown to assemble
the BASE BOLTS, you may want to
substitute actual nuts & washers.
